

Table 5--Value Provided by the Portions of the Uniform Milk Price at Test, by Federal Milk Order Marketing Area, February 2006 ^{1/}

Federal Milk Order Marketing Area	Order Number	Butterfat ^{2/}	Protein ^{3/}	Other Solids ^{4/}	Producer Price Differential	Somatic Cell Adjustment ^{5/}	Skim Milk ^{6/}	Uniform Price at Test
		Dollars						
Northeast	001	5.09	6.49	1.15	2.05	---	---	14.78
Appalachian	005	5.26	---	---	---	---	10.06	15.32
Southeast	007	5.23	---	---	---	---	9.79	15.02
Florida	006	5.25	---	---	---	---	11.32	16.57
Mideast	033	5.05	6.49	1.15	1.08	0.03	---	13.80
Upper Midwest	030	5.09	6.54	1.14	0.48	0.05	---	13.30
Central	032	5.04	6.56	1.15	0.71	0.05	---	13.51
Southwest	126	5.10	6.56	1.14	1.53	0.08	---	14.41
Arizona-Las Vegas	131	4.95	---	---	---	---	8.21	13.16
Pacific Northwest	124	5.08	6.56	1.14	0.40	---	---	13.18

^{1/} For those orders that use the component pricing system for paying producers (orders 1, 30, 32, 33, 124, and 126), the uniform milk price at test is the sum of the values of the butterfat, protein, and other solids components and the producer price differential. Orders 30, 32, 33, and 126 also include an adjustment for the somatic cell count in producer milk. For those orders that use the skim milk/butterfat pricing system for paying producers (orders 5, 6, 7, and 131), the uniform milk price at test is the sum of the values of butterfat and skim milk.

^{2/} For those orders using the component pricing system (see 1/); the butterfat value is the Class III butterfat price for the month (see Table 32 in 2006 annual) times the order's pounds of butterfat in 100 pounds of producer milk for the month (see Table 8 in 2006 annual for butterfat tests). For those orders using the skim milk/butterfat pricing system (see 1/); the butterfat value is the uniform butterfat price for the month (see Table 38 in 2006 annual) times the order's pounds of butterfat in 100 pounds of producer milk for the month (see Table 8 in 2006 annual for butterfat tests).

^{3/} The protein value is the Class III protein price for the month (see Table 32 in 2006 annual) times the order's pounds of protein in 100 pounds of producer milk for the month (see Table 10 in 2006 annual).

^{4/} The other solids value is the Class III other solids price for the month (see Table 32 in 2006 annual) times the order's pounds of other solids in 100 pounds of producer milk for the month (see Table 11 in 2006 annual).

^{5/} The somatic cell adjustment value is the somatic cell adjustment rate for the month (see Table 32 in 2006 annual) times the difference between 350,000 and the somatic cell count for all producer milk under the order for the month (see Table 12 in 2006 annual).

^{6/} The skim milk value is the uniform skim price for the month (see Table 37 in 2006 annual) times the order's proportion of skim milk in 100 pounds of producer milk (1 minus the order's butterfat test; see table 8 in 2006 annual).
